See GenBank Accession Number 105309 for hTAFII100; the 5' end is missing from the cDNA as this region is rich in GC residues; a few ambiguities remain in the CDNA sequence that may affect the reading frame near the 5' end; repeated efforts to obtain the full cDNA have been unsuccessful; numerous sequence runs have been performed to clarify the GC sequence ambiguities; the process is still
                                                                                                                                                                                                                                         HSU75308 4233 bp mRNA linear PRI 14-DEC-1996

It currently consists of 30 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence

                                                                                                                                                                                                                                                                                                        arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                               NOTE: This is a 'working draft' sequence. It currently consists of 12 contigs. The true order of the pieces is not known and their order in this sequence record is
  65994 bp in length 14675 bp in length 14717 bp in length 13724 bp in length 13723 bp in length 13731 bp in length 9539 bp in length 6541 bp in length 1982 bp in length 1982 bp in length 1599 bp in length 1599 bp in length
